	<u>Structural Systems</u>
1	
1.	Describe the type of:
	a. Foundation:b. Floor structure:
	c. Wall structure:
	d. Columns:
	e. Piers:
	1. Cening structure:
	g. Roof structure:
2	How were the following areas inspected:
۷.	
	a. Crawl space: b. Attic:
	9. 22009.
3.	Abnormal or harmful water penetration or condensation:
	he Desktop Training School
- 1	Exterior System
1	
1.	Describe wall cladding materials: Operate all entryway doors:
۷.	Oberate all enityway doors.
3	Garage (vehicle) doors:
3.	Garage (vehicle) doors:
3.	Garage (vehicle) doors: a. Test operation: b. Test electronic sefety beam:
3.	Garage (vehicle) doors: a. Test operation: b. Test electronic sefety beam:
3.	Garage (vehicle) doors: a. Test operation: b. Test electronic sefety beam:
3.	Garage (vehicle) doors: a. Test operation: b. Test electronic sefety beam:
	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System
	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System
	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System
	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System
	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System
	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System Describe roof covering materials: Report methods used to inspect roof & any limitations:
1. 2.	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System Describe roof covering materials: Report methods used to inspect roof & any limitations: Plumbing System
1. 2.	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System Describe roof covering materials: Report methods used to inspect roof & any limitations: Plumbing System Describe:
1. 2.	Garage (vehicle) doors: a. Test operation: b. Test electronic safety beam: c. Report on pressure sensitive safety reverse feature presence & whether tested: Roofing System Describe roof covering materials: Report methods used to inspect roof & any limitations: Plumbing System

		Plumbing System (continued)	
		d. Location of:	1
		i. Main water shut off device:ii. Main gas shut off device:	_
		-11-	_
_			
		Electrical System	
	1	L. Describe:	
		a. Service amperage & voltage:	1
		Wiring methods employed: b. Location of:	_
		: Main man 1	
		ii. Distribution panels:	
		 c. Observed presence of solid conductor AL 120V branch circuit wiring: □ Y □ N d. Smoke detectors present: □ Y □ N 	
		AC & Heating System	
		L. Describe:	
		a. Energy sources:	
		ii. Heater: b. Distinguishing characteristics of:	
		i. AC:	_
		II. Healer.	
		2. System operated by normal controls: $\Box Y \Box N$	
	3	3. Open access panels (intended for homeowner maintenance): $\square \ Y \square \ N$	
		Interior System	
			1
	2	 Operate a representative number of windows & interior doors: □ Y □ N Abnormal or harmful water penetration or condensation:	
		3. Presence of suspected mold or microbial growth: $\Box Y \Box N$	
		Insulation & Ventilation System	
	1	1. Describe insulation & vapor retarders in unfinished spaces:	
		2. Describe absence of insulation in unfinished space at conditioned surfaces:
